---

### SUMMARY

I'm a passionate and creative student with a strong interest in design and digital content creation. I enjoy working on posters, editing photos and videos, and managing social media content. I've gained hands-on experience using tools like Adobe Photoshop, Premiere Pro, and DaVinci Resolve to bring ideas to life and tell visual stories. I love learning new skills, exploring creative software, and collaborating with others on meaningful projects. I'm currently looking for opportunities to grow, contribute, and be part of a team where I can apply my creativity and learn even more.
